Createspace, United States, 2014. Paperback. Book Condition: New. 203 x 124 mm. Language: English . Brand New Book. Can You Save The World? It s so easy to be overwhelmed by everything that is wrong in the world. In 2010, there were 660,000 deaths from malaria. Dire predictions about climate change suggest that sea levels could rise enough to submerge both Los Angeles and London by 2100. Bees are dying, not by the thousands but by the millions. But what can you do? You re just one person, right? The good news is that you *can* do something. It s called citizen science, and it s a way for ordinary people like you and me to do real, honest-to-goodness, help-answer-the-big-questions science. This book introduces you to a world in which it is possible to go on a wildlife survey in a national park, install software on your computer to search for a cure for cancer, have your smartphone log the sound pollution in your city, transcribe ancient Greek scrolls, or sift through the dirt from a site where a mastodon died 11,000 years ago-even if you never finished high school. Part I of *Be the Change: Saving the World with Citizen Science* will show you what citizen science is, how important it is, and why we need more of it. You will also find out how it can personally benefit you, how you can get involved, and what it might mean to you if you did. Part II provides a large list of projects that you can join right now, concisely explained, and organized by the level of involvement required. Citizen science is fun, it s easy, and you can get started today. *Be the Change: Saving the World with Citizen Science* will show you how. Show less.
